PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later".

3D2, FIJI. Bill, VK4FW, will once again be active as 3D2T from Nadi, Viti Levu Island (OC-016), between July 16-27th. He is there on a family holiday set up by his sister. Using a K3, Bill will be active on 40/30/

4L, GEORGIA. Mamuka Kordzakhia, 4L2M, President of the National Association Radio Amateurs of Georgia (NARG), reports: "Abkhazia is a Georgian territory occupied by Russia. From this territory Russian radio amateurs are using Russian prefixes. By Georgian rules all these stations are without permits and they are pirate stations. STOP Russian callsigns from the Georgia territory!!! We are very opposite to the uses of Russian callsigns from Georgian territory." PLEASE NOTE: The Georgian Republic prefix of 4L has been in effect since August 1, 1994. Abkhazia is not part of Russia, and therefore cannot count as Russia for DXCC.

4L, GEORGIA. Operators Armen/4L6DL, Sergo/4L6QC, Antoine/F5RAB, Luc/F5RAV and Alexander/UR5EAW will be active as 4L0GF from Zeda Tkhlilnari, Georgia, between August on 3-13th. ADXG IS NOT ASSOCIATED WITH ZZ0T. Oms, PY5EG, informs OPDX that they've (Araucaria DX Group) been receiving quite a number of e-mails asking information about the DXpedition to Trindade Island ZZ0T. A group of Brazilian and Argentines DXers are organizing a operation from Trindade Island in near future, and the information that the ADXG has is what is written on QRZ.com under ZZ0T, and a general letter signed by Martin Bufera (LU9EFO) addressed to the DX community. The ADXG is not the organizer of this expedition. They have been part of several previous expedition to the island, but not this one. They wish total success of this event. There has not been a operation from Trindade for a quite long time. The ADXG suggests future contact be made with Martin, PT2/LU9EFO.

DXCC RULES ARE ABOUT CHANGE? (It's Been a While) Wayne Mills, N7NG, at DX University reports (on July 12th): "Yes, it's been a while -- too long -- since I have reached for the keyboard to express some fact and opinion. In July 2004, changes were made to the DXCC List Criteria that -- as time would tell -- rendered the criteria ineffective." In the article written by Wayne, he goes on states, "We hope to see a change coming within the next ten days (ed. which would be July 22nd). Much effort has gone into the process required to effect this change. On Monday of next week (ed. July 17th), on this page (ed. see Web page below), I will elaborate on the original 'situation' and its effects. Why it happened, and how we proposed to fix it." Wayne's complete article was on the "DX University" Web site , but has since been removed. It can now be found on: <https://dx-world.net/change-in-the-dxcc-rules>

REALTIME BAND CONDITIONS WEB SITE :

The purpose of this experimental Web site is to provide 24-7-365 actual (REALTIME) band condition information to CW QRPp, QRPe and CW/SSB for Contesters interested in increasing their scores. It can also be of benefit to other Radio Amateurs to determine band conditions for Nets and casual QSO's. This information is NOT based on any software predictions or any kind of satellite based readings. It is based on a new Ionospheric sounding method called "HF Ionospheric Interferometry" which operates very similarly to the PolSAR system used by NASA.

Here's an article I wrote in Nuts & Volts magazine presenting several things they can do with radios they already have to hear the effect themselves. There are other articles to read listed in the article and on the HamSCI website, too. Got your goggles yet?"
